Lab No: 17-031  
Sample Location: C# 232189, 251 Edwards St., Crockett, CA  
Sample Type: Fallout (red yellow droplets) observed on neighborhood cars in Crockett  
Source Operation: N/A  
Date Received: 7/28/2017  
Date of Report: 7/31/2017  
Analyst: D.P. Patel  
Lab Ref. No: DP15:23

Sample Description:  
The sample was submitted in a sealed plastic petri dish. The sample consisted of inhomogeneous mixture of several yellowish-brown bits (size ~ < 0.5 cm x <0.2 cm) and could not be weighed. The sample bits were amorphous and soft.

Results of Microscopic Examination:  
The sample was first examined under a stereo microscope. It was then photographed (magnification of 10X and top light) under a PLM microscope equipped with a digital camera. Sample consisted of: (>90% of sample) Yellowish brown non-crystalline material.

Conclusion:  
The sample resembles bee excrement.

Note: Sample submitted for information only.

VIN. Recommended: □Yes □No Reg. Rule Sec.
